CBAM in a nutshell

Carbon Border Adjustment Mechanism

Target

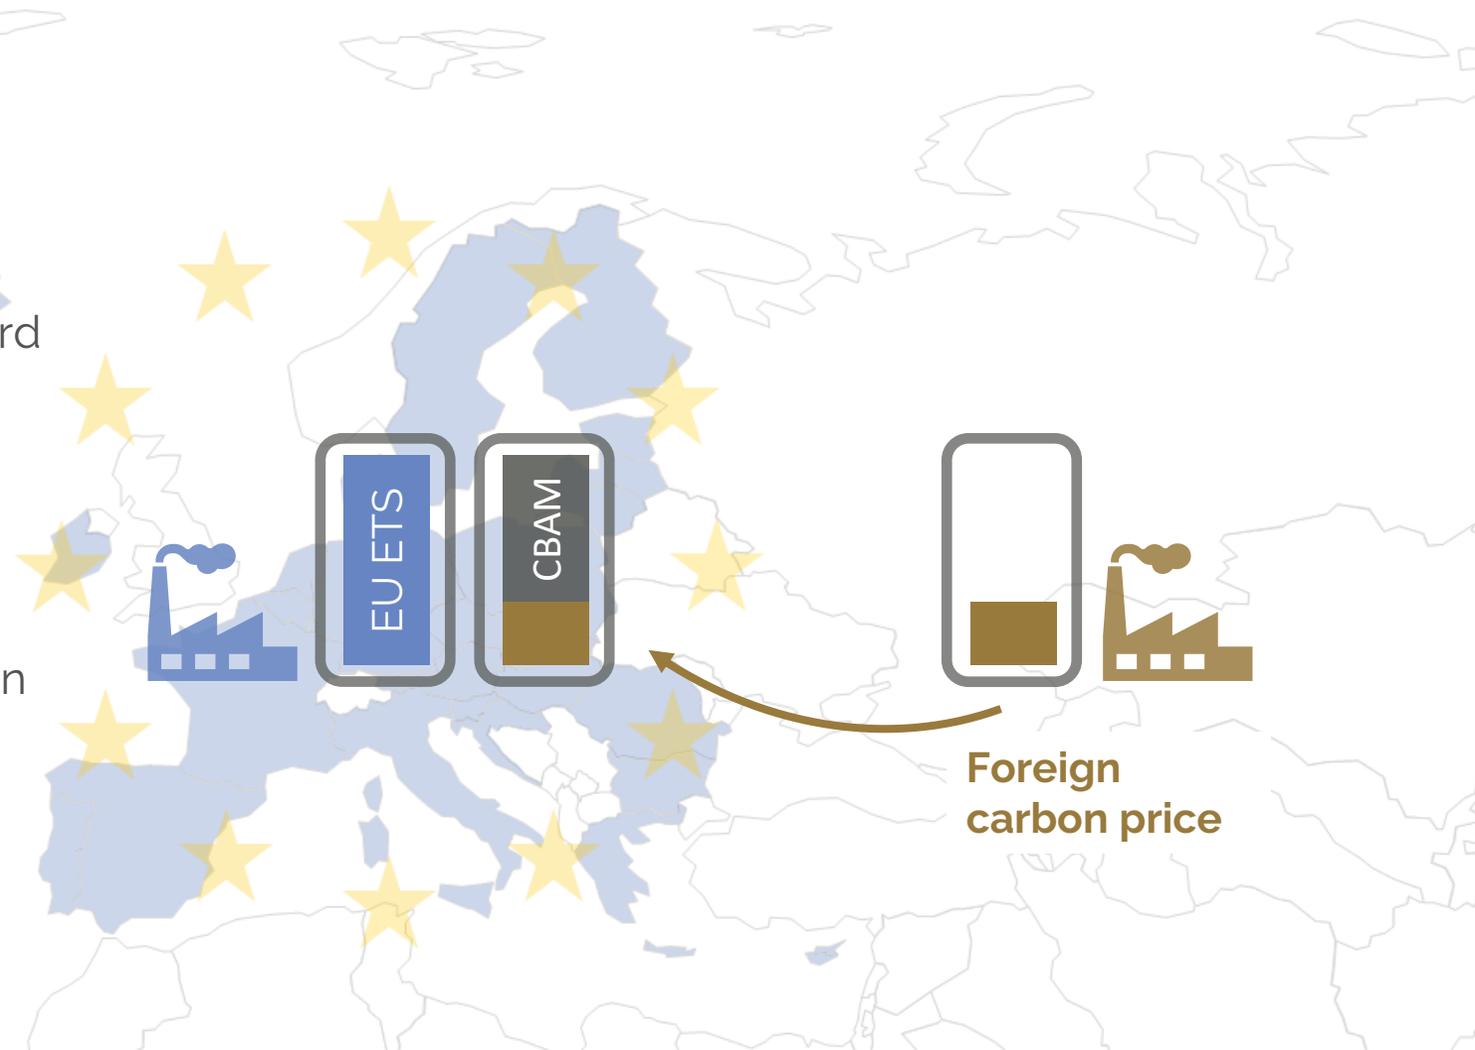

- › **Equality** of EU and non-EU producers with regard to **CO2 prices paid**
- › Reducing **carbon leakage** and incentivising decarbonisation abroad

Mechanism

- › Recording and pricing of embedded emissions in imported products

Scope

- › 6 sectors accounting for more than 20% of EU emissions

Aluminium

Cement

Electricity

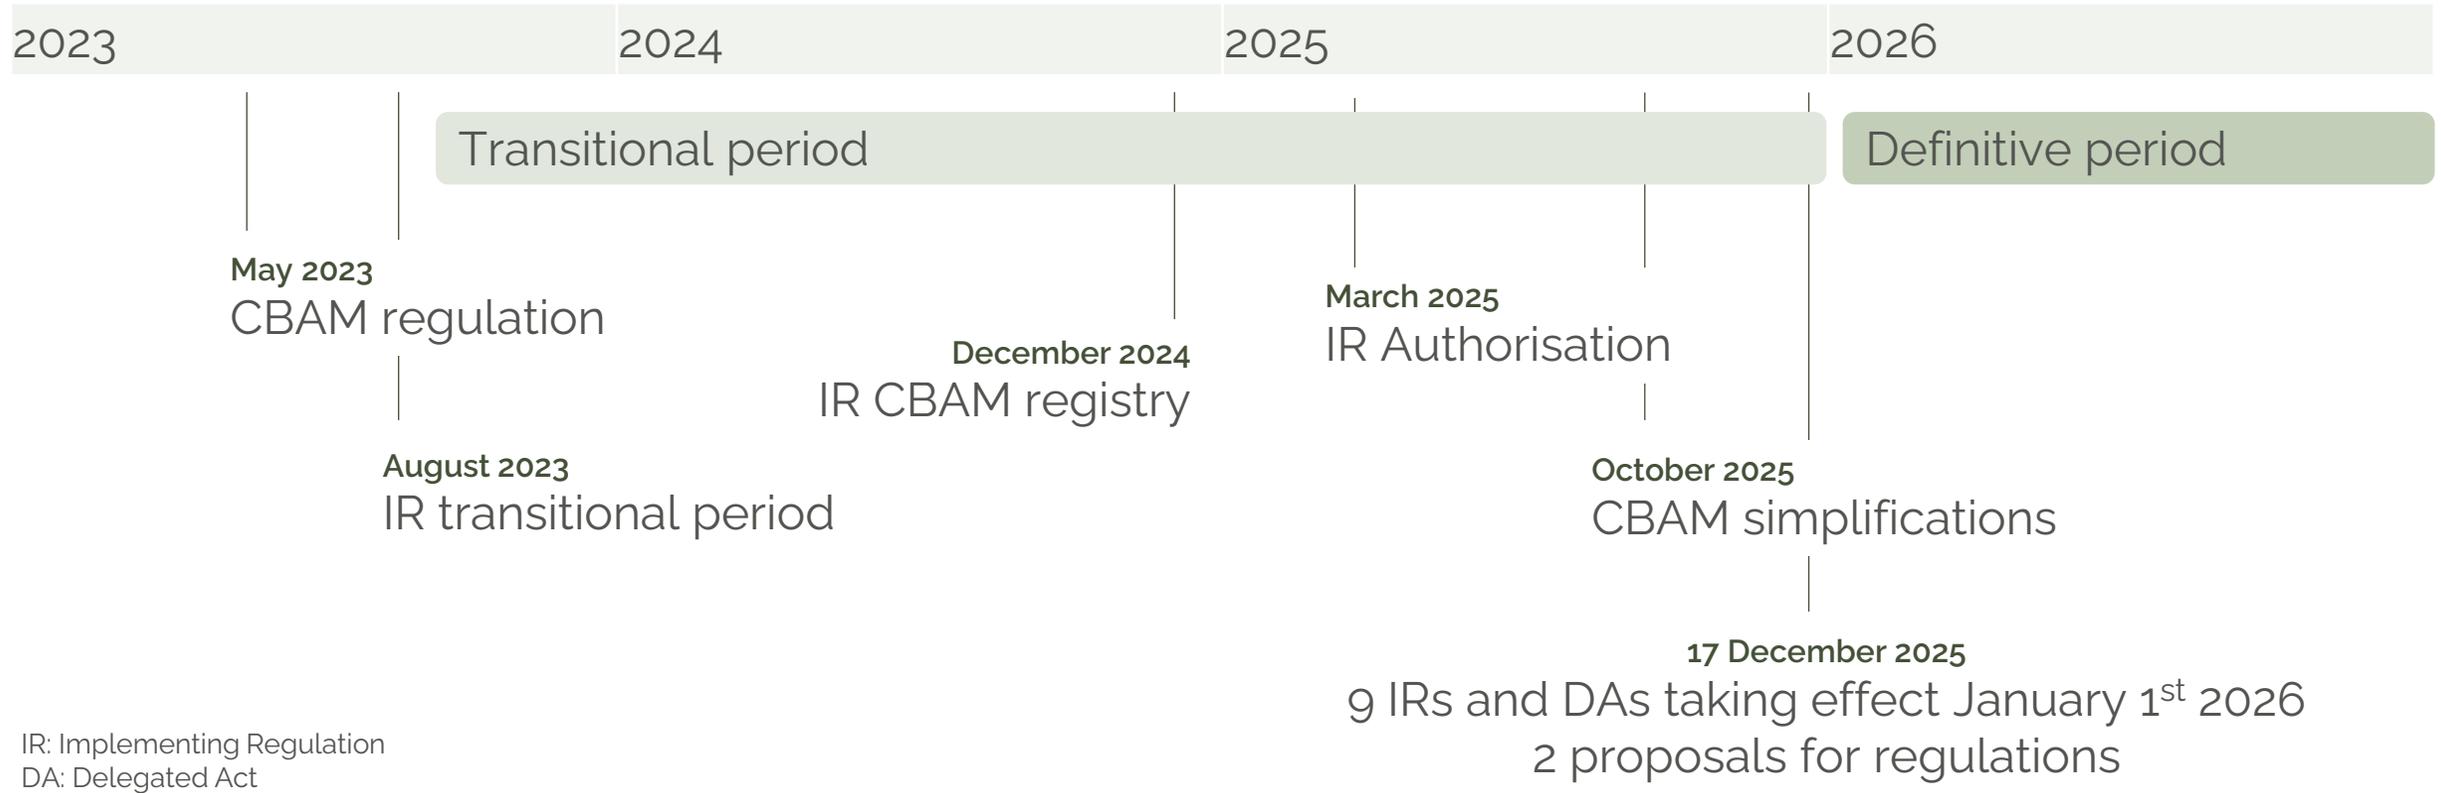

Fertilizers

Hydrogen

Iron & Steel

CBAM Legislative History

January 2026

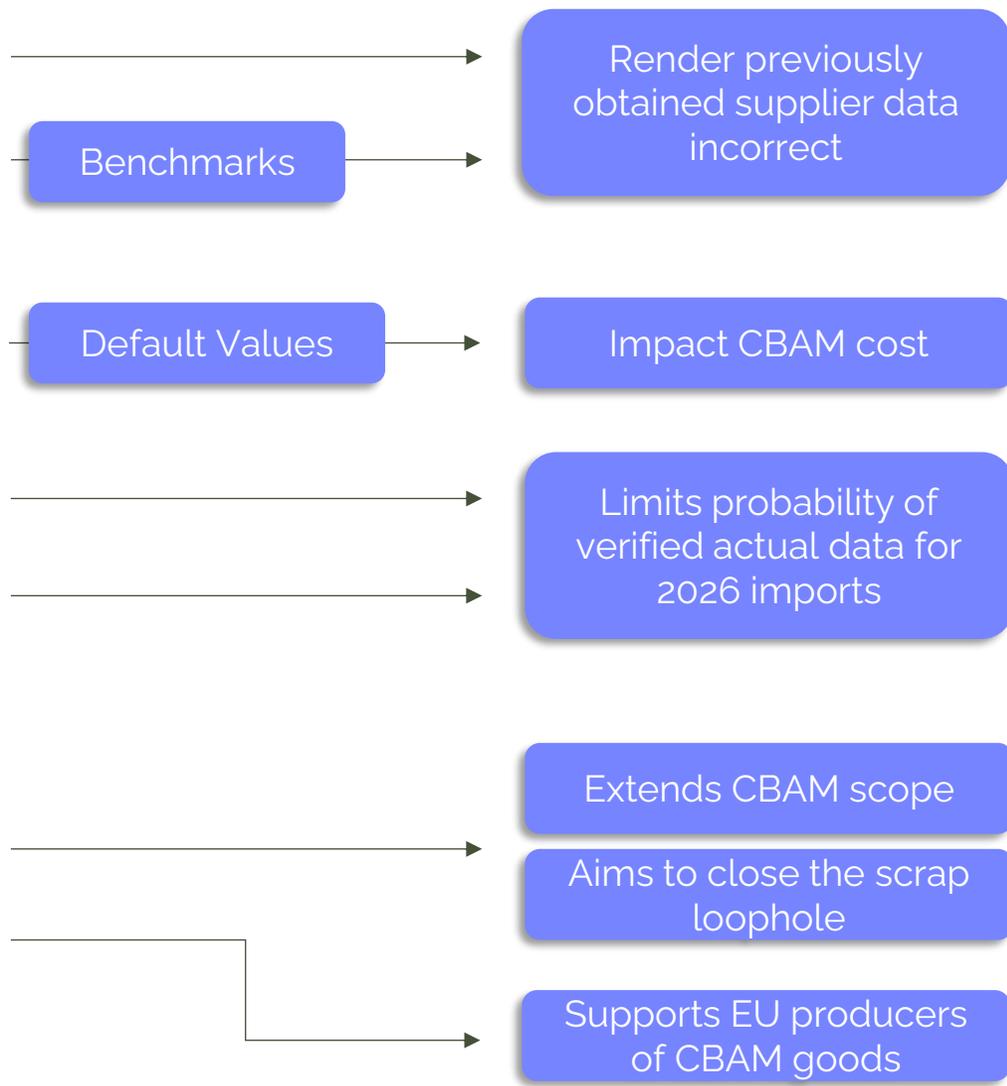

Update on CBAM Legislation

January 2026

Published December 17th
date of effect January 1st

Legislation	Content	Status	Source
IR	Calculation rules for embedded emissions	In force	Link
IR	Calculation of the free allocation adjustment to the number of CBAM certificates to be surrendered	In force	Link

CBAM Benchmarks

UPDATED

EU Commission

Assumption: No CO2 prices paid in the supply chain. Regulation announced for Q1 2026.

CBAM Default Values

Updating Cost Estimates

- › Default values apply equally to CBAM goods and their precursors
 - › No limit on their application for precursors
- › Phase-in of mark-ups from 2026 to 2028
 - › Fertiliser mark-up remains static at 1%
- › Default values are country-specific
 - › If unavailable, apply 'Other countries and territories': average of the 10 worst-performing countries.

Algeria								
Product CN Code	Description	Default Value (direct emissions)	Default Value (indirect emissions)	Default Value (total emissions)	2026 Default Value (including mark-up)	2027 Default Value (including mark-up)	2028 and onwards Default Value (including mark-up)	Underlying production route determining CBAM BM
7614	Stranded wire, cables, plaited bands and the like, of aluminium, not electrically insulated	1,140	N/A	1,140	1,254	1,368	1,482	(L)
7616 10 00	Nails, tacks, staples (other than those of heading 8 305), screws, bolts, nuts, screw hooks, rivets, cotters, cotter pins, washers and similar articles	1,600	N/A	1,600	1,760	1,920	2,080	(L)
7616 91 00	Cloth, grill, netting and fencing, of aluminium wire	1,600	N/A	1,600	1,760	1,920	2,080	(L)
7616 99 10	Cast	0,920	N/A	0,920	1,012	1,104	1,196	(L)
7616 99 90	Other	1,600	N/A	1,600	1,760	1,920	2,080	(L)

2804 10 00	Hydrogen	10,820	N/A	10,820	11,902	12,984	14,066	
Iron and steel					10% mark-up	20% mark-up	30% mark-up	
2601 12 00	Agglomerated iron ores and concentrates (excl. roasted iron pyrites)	0,180	0,030	0,210	0,231	0,252	0,273	
7201	Pig iron and spiegeleisen, in pigs, blocks or other primary forms	2,870	N/A	2,870	3,157	3,444	3,731	
7202 11	Ferro-manganese, containing by weight > 2% of carbon	-	N/A	-	-	-	-	
7202 19	Ferro-manganese, containing by weight <= 2% carbon	-	N/A	-	-	-	-	

Default values from IR 2025/2621, available for download in spreadsheet format on [carboneer website](#).

CBAM Benchmarks

Updating Cost Estimates

- › CBAM benchmarks ensure non-EU products receive equivalent CO₂ pricing exemptions as EU products
 - › Higher benchmarks result in larger CBAM fee reductions
- › Individual benchmarks apply to each specific production route
- › Column A enables non-EU producers to calculate their individual benchmark
 - › Derived from combinations of rows in the table
 - › Current producer data lacks complete and accurate reflection of benchmarks
- › Column B provides 'default benchmarks' for importers declaring default values
 - › Distinctions outlined in the legend

CN code	CN Description	Column A BMg* [tCO ₂ e/t]	Column B BMg [tCO ₂ e/t]
7202 60 00	Ferro-nickel	2,390 (1) 2,295 (2)	2,390 (1) 2,295 (2)
7203 10 00	Ferrous products obtained by direct reduction of iron ore, in lumps, pellets or similar forms	0,295	0,397
7203 90 00	Spongy ferrous products, obtained from molten pig iron by atomisation, iron of a purity of ≥ 99,94 %, in lumps, pellets or similar forms	0,295	0,397
	s, of pig iron, spiegeleisen, iron or steel (excl. of ferro-alloys, turnings and filings of iron or certain small calibre items, defective balls for rings)	0,000	1,288 (C) 0,424 (D) 0,027 (E)
	, of alloy steel (excl. powders of ferro-alloys and radioactive iron powders "isotopes")	0,000	1,460 (F)(1) 0,659 (G)(1) 0,328 (H)(1) 0,852 (J)(1) 1,298 (F)(2) 0,647 (G)(2) 0,315 (H)(2) 0,820 (J)(2)
	s, of pig iron, spiegeleisen, iron or non-alloy cl. powders of ferro-alloys and radioactive vders "isotopes")	0,000	1,288 (C) 0,424 (D) 0,027 (E)

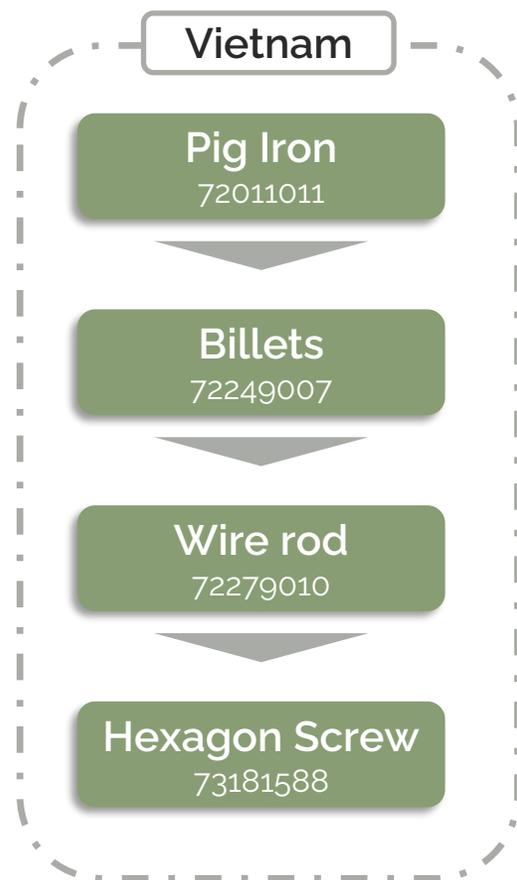

Legend

- (1) Value is to be used for production years 2026-27
- (2) Value is to be used for production years 2028-30
- (A) grey clinker / cement
- (B) white clinker / cement
- (C) Carbon Steel based on BF/BOF
- (D) Carbon Steel based on DRI/EAF
- (E) Carbon Steel based on Scrap/EAF
- (F) Low alloy Steel based on BF/BOF
- (G) Low alloy Steel based on DRI/EAF
- (H) Low alloy Steel based on scrap/EAF
- (J) High alloy Steel (based on EAF)
- (K) primary Aluminium
- (L) secondary Aluminium

1,459	1,364	0,247	1,364

Reporting Requirements

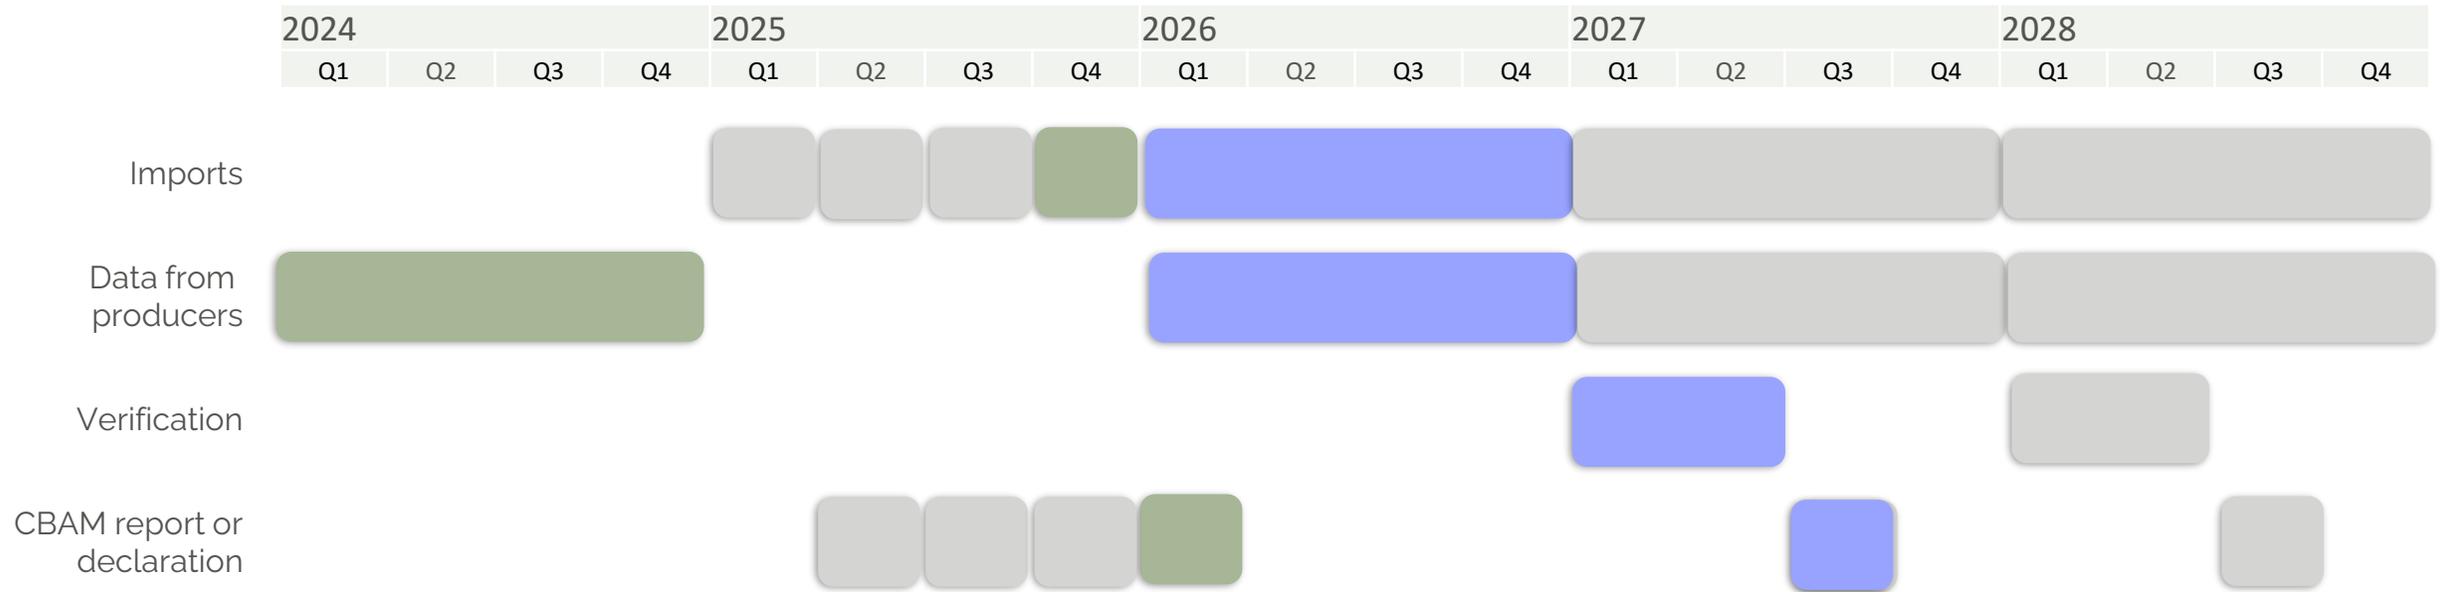

Actual Data and Default Values

Reporting Requirements

Actual Data and Default Values

- › Default rule starting 2026: Importing period = reporting period for producers
 - › Special rule starting 2027 with sufficient evidence from producers: Importing period = previous reporting period for producers

- › Manageable reporting obligations during 2026
 - › 2026 imports are associated with cost obligations

Ensure compliance and free resources by outsourcing and simplifying CBAM data collection and report creation.

carboneer's proprietary **cbam.hub** is an expert-backed reporting solution that collects CBAM data from the supply chain and generates compliant CBAM reports ready to upload directly to the CBAM registry.

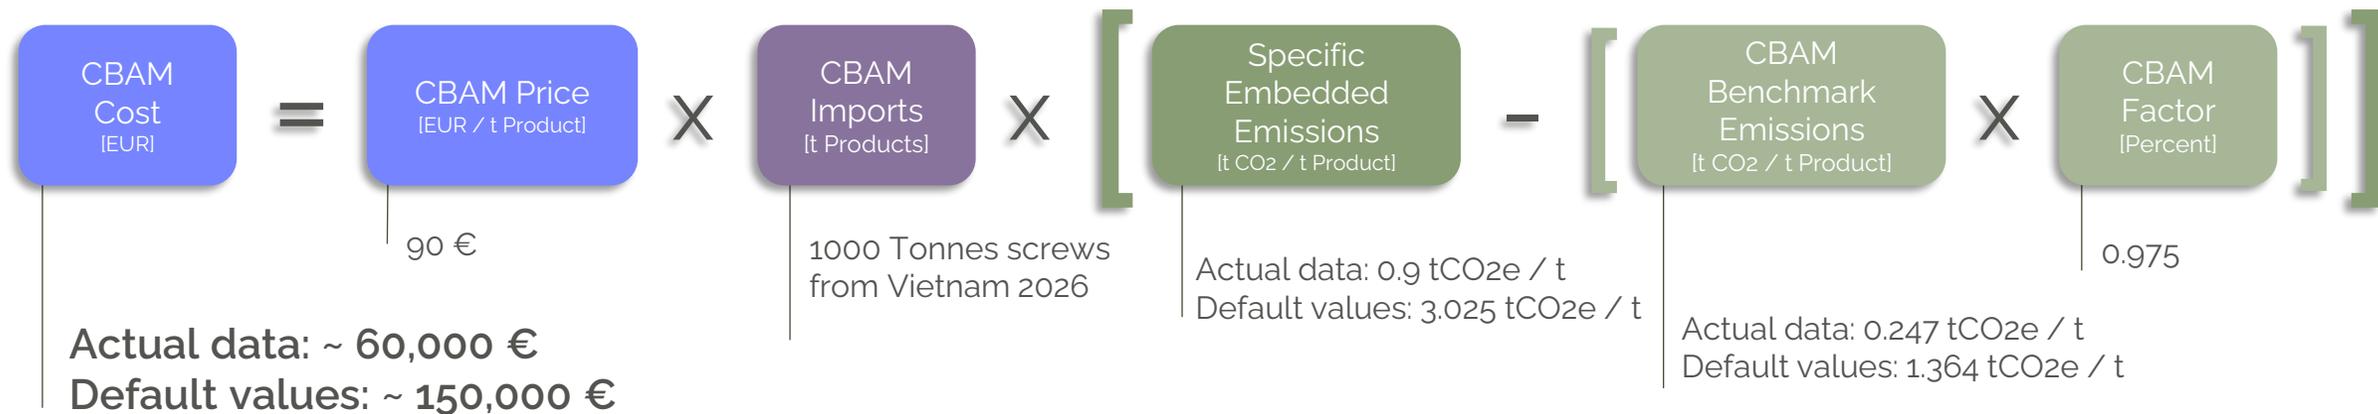

What makes it special: You don't need to operate the application or evaluate the results. carboneer takes care of it for you.

cbam.hub

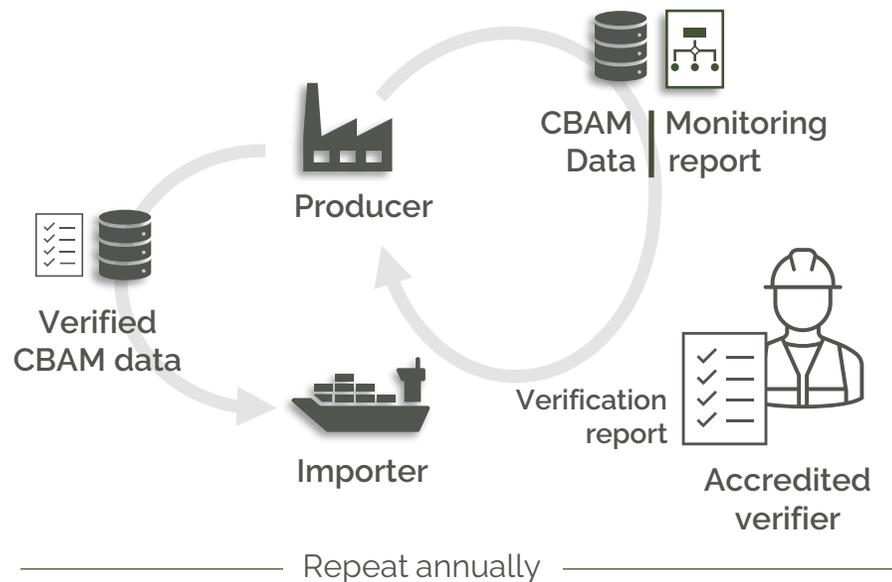

- 01 Export CBAM-data from customs- or ERP-system**
Via Excel template or programmed interface
- 02 CBAM data from suppliers is queried**
Supplier portal accessible via web browser
- 03 Completeness, plausibility & documentation**
Implausible data and supplier activity documented in report attachment
- 04 CBAM declaration upload to the registry**
1 file – available at any time
Upload to the CBAM registry in 5 minutes

Verified Actual Data

Relevance & Requirements

Application of Verified Actual Data

- › Importers are allowed to use verified CBAM data from producers and otherwise must resort to (punitive) default values.
- › **Verification possible only with implemented monitoring system**
 - › When checking producers' CBAM readiness also request monitoring plan
- › Bottleneck Verification 2026:
 - › Availability of accredited auditors
 - › Moderately prepared producers
 - › Limited time (Jan-Sept)
 - › Verification along the value chain

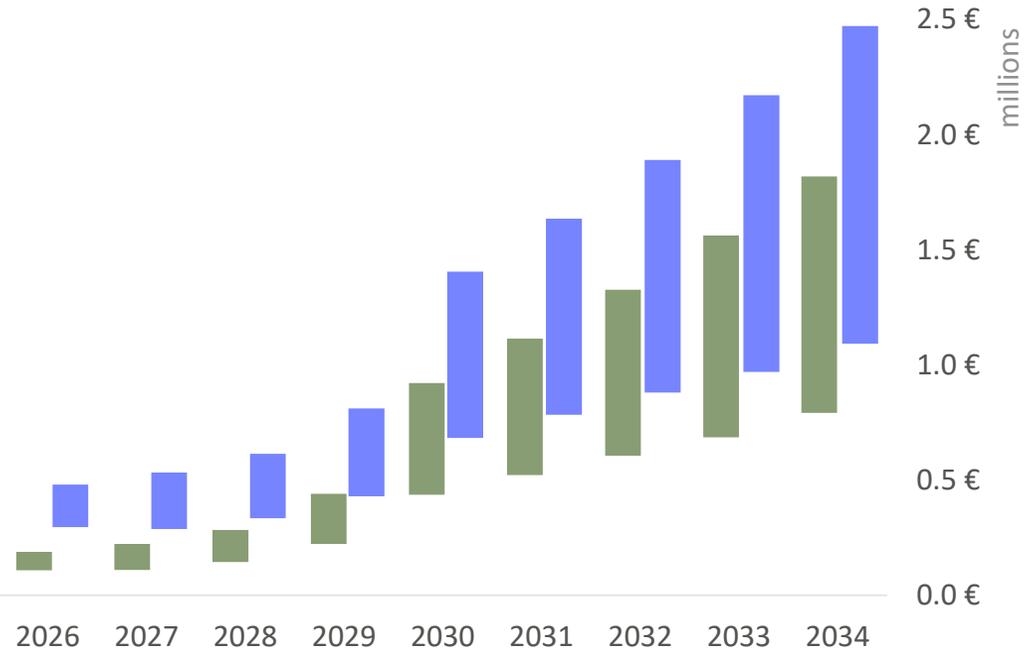

Only prepared producers can be verified!

Verified Actual Data

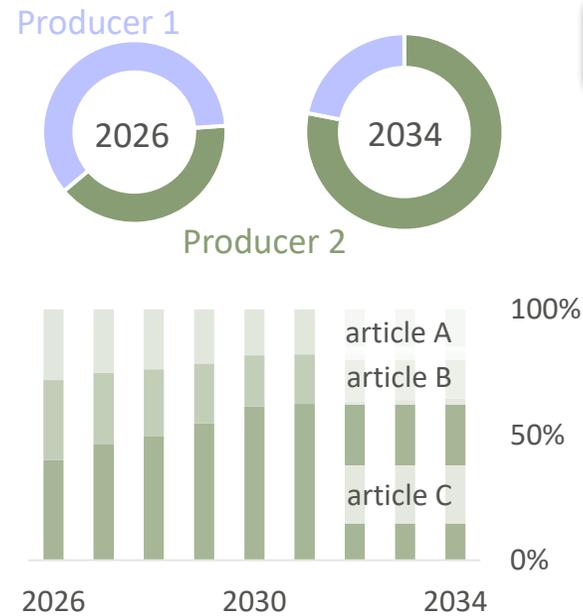

Relevance & Requirements

Total CBAM Cost

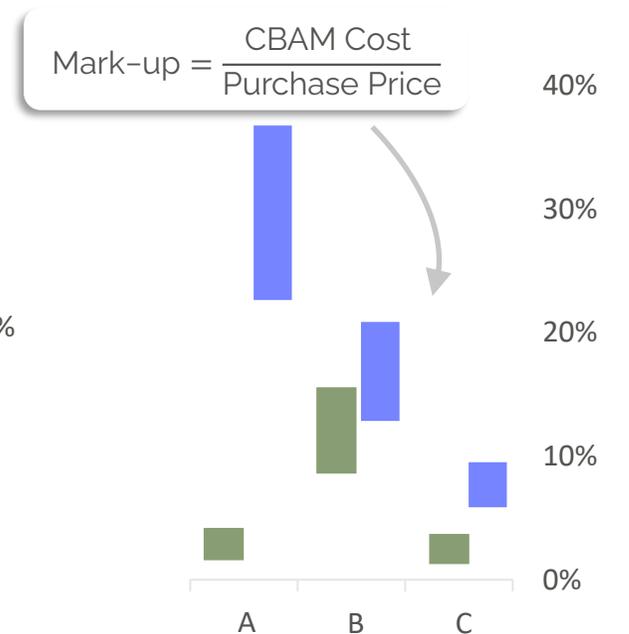

Cost incurred (exemplary) for imports of CBAM goods given actual data from producers (green) and default values (blue).

Cost Contributions

Cost relevance of individual producers and imported goods.

Vulnerability

CBAM Cost Mark-ups of individual articles (actual data vs. default values)

Understanding impacts

Determine need to actively manage CBAM costs.

Adjust budgeting

Make provisions & hedge CBAM costs.

Identify hotspots

Manage cost drivers & identify alternatives.

Risk management

Assess the probability of real data, adjust supplier contracts & negotiate cost sharing.

Verified Actual Data

Relevance & Requirements

Webinar Announcement

CBAM costs and verification

29.01.2026 | 10:00 – 11:00 CET

Agenda

- Regulatory CBAM update
- Cost implications of CBAM based on a case study
- Preserving competitiveness through actual, verified emissions data
- Verification processes under CBAM
- Relevant data points and how to prepare for verification
- Live Q&A

Simon Göß
carboneer GmbH

Roland Wollenweber
TÜV Rheinland Group (Verifier)

CBAM Certificate Management

Obligations & Implications

- › From 2026, every tonne of imported CBAM emissions must be covered by a CBAM certificate
- › Unlimited supply of certificates
- › Price follows the weekly average of auction prices in the EU Emissions Trading System 1
- › Procurement via Common Central Platform (CCP)
- › CBAM certificates cannot be traded between companies
- › Return of surplus certificates possible to a limited extent
- › Cancellation of expired certificates without compensation

CBAM Certificate Management

Obligations & Implications

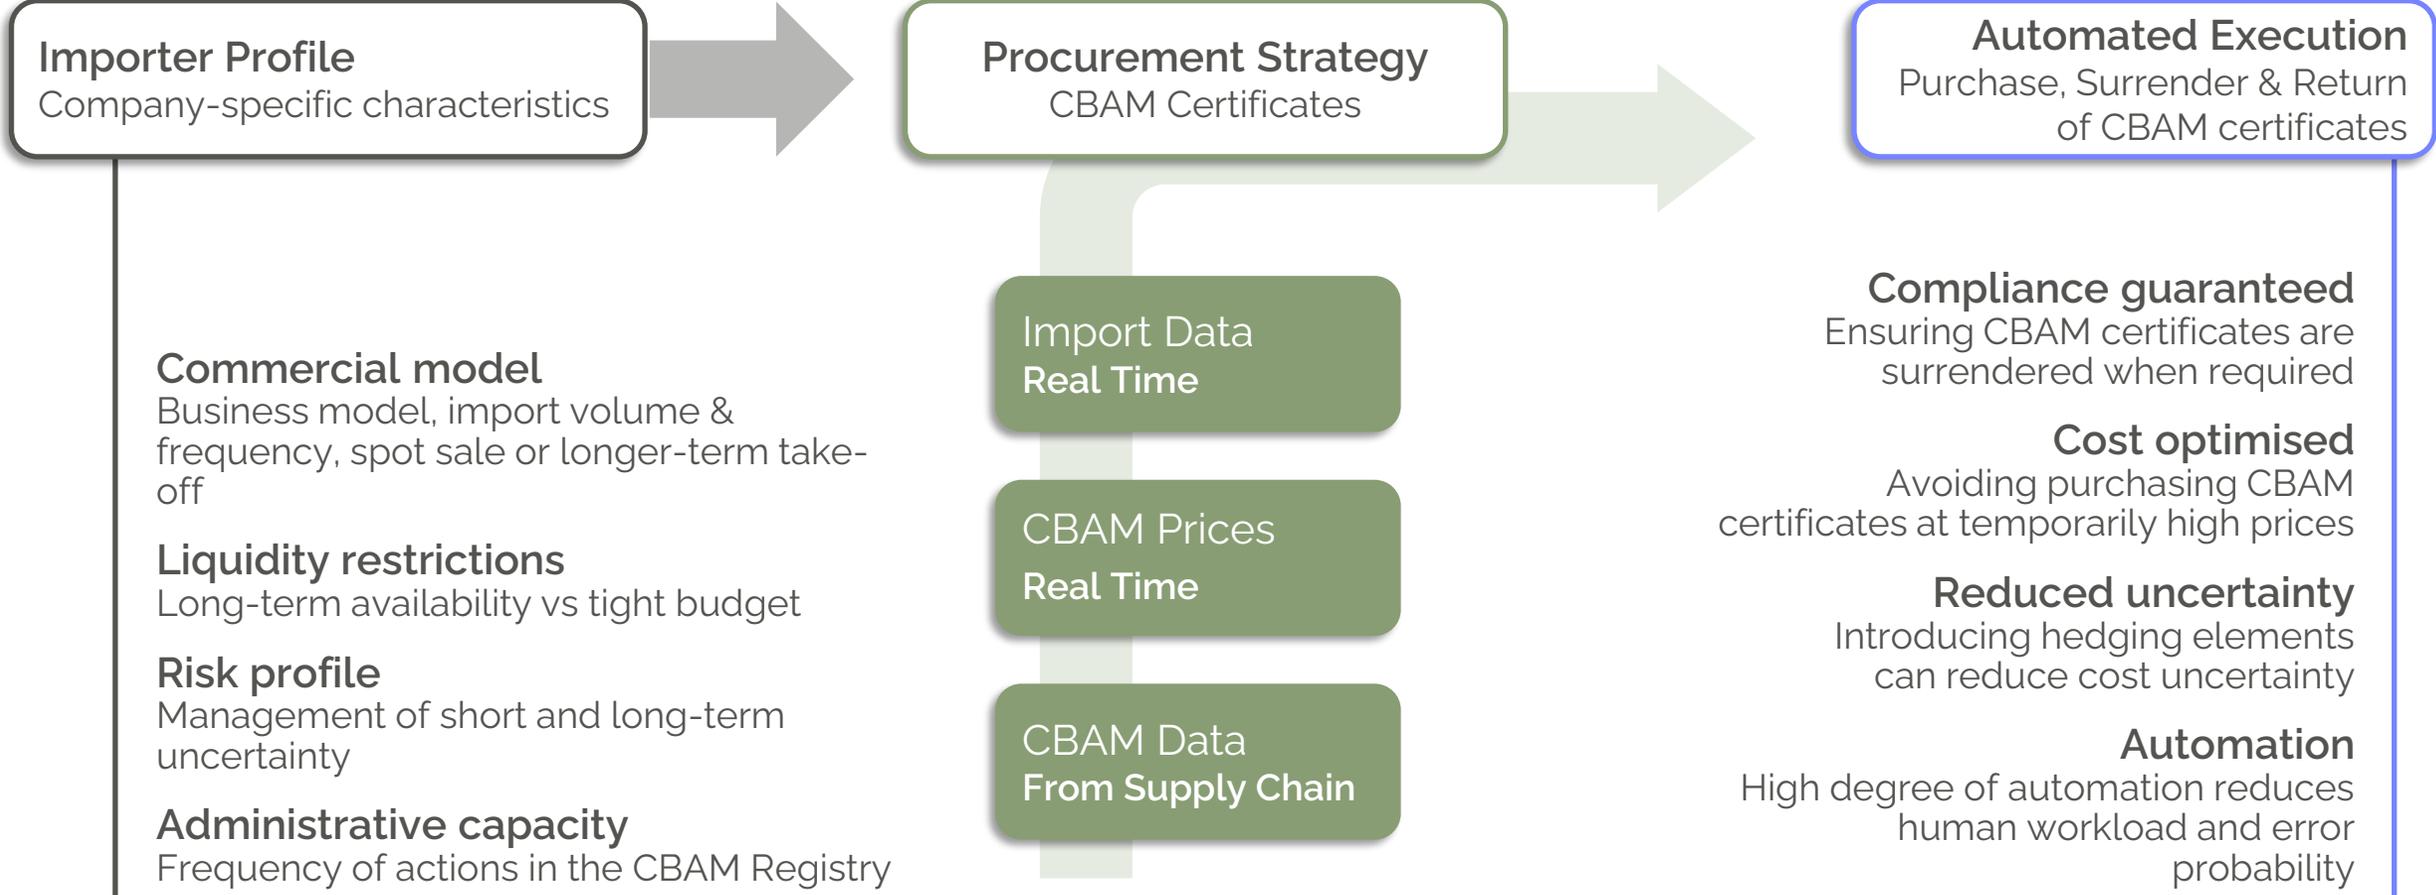

- › Certificate surrender for 2026 imports due with CBAM declaration on 30 September 2027
- › **Security requirement** from 2027: Hold certificates equal to 50% of year-to-date CBAM emissions for all imports, reviewed quarterly
 - › **Proposed:** Security requirement fulfilled only with certificates matching the vintage of the imports
 - › **Vintage management required for CBAM certificates**
- › 2026 quarterly imports covered with certificates priced at quarterly weighted average EU ETS allowance prices
 - › Temporary deviation from standard certificate pricing
 - › Free **carboneer CBAM Price Tracker** available soon

CBAM Certificates

CBAM Certificate Management

Obligations & Implications

Active CBAM Cost Management

The carboneer Approach: Automated Procurement

Data on CBAM-Imports
In real time or at frequency determined by client

Procurement Strategy
Tailored to client: commercial model, risk profile, administrative capacity

(Semi-) automated procurement ✓

CBAM Compliance Model
OUTPUT: Requirements on CBAM certificates (volumes & dates)

CBAM Optimisation Model
OUTPUT: Real time signals to purchase, surrender, return CBAM certificates and Allowances from the EU ETS

Eased compliance ✓

Minimised cost ✓

Actionable Signals

CBAM Scope Extension

Overview & Implications

Scope extension

- › Extension proposed through an amendment to Annex I of the CBAM Regulation
- › **TBC:** Entry into force proposed for 1 January 2028, with declarations in 2028 covering 2027 imports
 - › **2027 imports generate CBAM cost due in 2028**
- › Based on 2027 data, de-minimis threshold to be recalibrated for 2028 declarations
- › **Preparation in 2026:** build internal capacity, engage suppliers, and adjust pricing models

Anti-circumvention

- › Additional information in CBAM declarations requestable
- › Aluminium and ferrous waste and scrap are precursor materials

Serious and unforeseen circumstances

CN Chapter	Product Scope Description
73 (Iron & Steel Articles)	Stranded wire, ropes, grill/netting, nails, castings, springs, and household articles of iron or steel.
74 & 83 (Copper & Base Metal Fittings)	Copper or mixed-metal fasteners, fittings, stoppers, hinges, and other household hardware containing steel or aluminium.
84 (Mechanical Machinery & Equipment)	Pumps, burners, engines, cooling towers, lifting machinery, washing machines, foundry equipment, industrial robots, moulds, and machine parts containing steel or aluminium.
85 (Electrical Machinery & Components)	Motors, transformers, inductors, welding machines, and insulated electrical conductors containing steel or aluminium.
87 (Vehicles & Parts)	Diesel, hybrid, and electric road vehicles, engines, chassis, bodies, gearboxes, suspension, and radiators.
90 (Medical & Measuring Instruments)	Metal-based needles, apparatus, and analytical instruments containing steel or aluminium.
94 (Furniture & Prefabricated Buildings)	Seats with metal frames, office metal furniture, and prefabricated structures containing steel or aluminium.

Supporting EU-Producers of CBAM Goods

Temporary Decarbonisation Fund

- › Member States contribute 25% of CBAM revenues
- › Conditional support requires producers to demonstrate decarbonisation investments
- › Applications must be submitted to the national competent authority by 31 March 2028
- › Support levels are determined by the value of free allocations being phased out and prevailing EU ETS prices
- › Support is granted on the basis of production, not exports
- › Support disbursed by 31 December 2029 latest

CN Chapter	Goods Categories Covered
76 (Aluminium)	Non-alloy aluminium plates, sheets, and strip, aluminium foil (backed or not); aluminium wire, aluminium powders and flakes; fasteners and hardware made of aluminium; aluminium composite panels
28, 31 (Fertilisers)	Mineral and chemical fertiliser; nitrates, phosphates, potash and complex nitrogen fertilisers; mixed fertilisers (NPK, NP, NK types; fertilisers of animal or vegetable origin
26, 72, 73 (Iron and Steel)	Iron ores and concentrates, pig iron and spongy ferrous products; ferro-alloys (FeMn, FeCr, FeNi); semi-finished and flat-rolled products (alloy, non-alloy, stainless); bars, rods, wire products, tubes & pipes (seamless/welded); tube fittings, flanges, bolts, screws, nuts, washers; forged and sintered steel articles

Thank you for your Attention!
